

MARÍA MILAGROS LAHUERTA

Biomedical Engineering Master's Student

@ milagroslahuerta00@gmail.com +39 331 806 7506

Turin, Italy 15/08/2000 MARÍA MILAGROS LAHUERTA

PROFILE

Final Year of Master of Science in Biomedical Engineering student, currently completing a double degree program between the National University of Córdoba and Politecnico di Torino.
Seeking an internship/thesis opportunity to deliver high-impact clinical solutions and advance my professional growth.

EDUCATION

Double Master's Degree Politecnico di Torino
2025 – Present Turin, Italy
• Completing final M.Sc. year.
• **Current Average:** 26.6/30

Biomedical Eng. Degree National University of Córdoba
2020 – 2024 Argentina
• University Bachelor's Degree in Biomedical Engineering.

TECHNICAL SKILLS

PythonMATLABC++Git

StreamlitLaTeXSignal Processing

Machine LearningData Science

3D BioprintingMedical Imaging Tools

PROFESSIONAL SKILLS

LeadershipTeamwork

Analytical ThinkingProblem Solving

Multidisciplinary Strategy

EXPERIENCE

Supervised Professional Internship Conci Carpinella Institute
May 2024 – Oct 2024 Córdoba, Argentina
• Managed technology lifecycle, calibration, and PPM metrics.
• Assisted in functional fMRI setups and 128-channel EEG pipelines.

President (2025-2026) & VP (2024) IEEE UNC Student Branch
Feb 2024 – Feb 2026 Córdoba, Argentina
• Directed strategic initiatives, engineering teams, and bioengineering networks.

3D Design and Printing Course EMBS IEEE & Universidad de la República
Jan 2025 Córdoba, Argentina
• Specialized in technical 3D modeling frameworks and design architectures.

Multidisciplinary Innovation Program iTeams – CONICET – Ministry of Science & Tech
Aug 2024 – Oct 2024 Córdoba, Argentina
• Analyzed deployment frameworks to implement research outcomes in local institutes.

Course “AI Tools in Medical Imaging” EMBS – IEEE / SABI
June 2024 Argentina
• Trained in machine learning and matrices for automated diagnostic tools.

Collaboration in In Vivo Experiments INICSA Institute
May 2024 – Oct 2024 Argentina
• Collaboration on experimental protocols to analyze diabetes complications.

Internship Pediatric Clinic
Apr 2017 Bietigheim-Bissingen, Germany
• Gained immersive structural knowledge inside complex clinical operations.

International Fellowship Class (IFC) Friedrich Schiller Gymnasium
Sep 2016 – July 2017 Marbach, Germany
• Developed high-level intercultural and academic communication skills.

SELECTED PROJECTS

- X-Ray Diagnostic Imaging Services – Healthcare Facilities Design.
- Right Hand Prosthesis – 3D Printing & Assistive Tech.
- Linear Control Systems & Plant Analysis – Frequency & Time Domain Dynamics.
- Digital Twin System for Remote Patient Monitoring.
- Secure Telemedicine Web Application for Advanced ECG Analytics.
- Automated CAD System for Colorectal Cancer vs. Diverticular Disease Differentiation.
